

# Lions

Mike and Daniel

Competing, Vulnerable, Warm, Mother, Den, Four, Gestation, Heat, Prides, Camouflage, Savanna, Twenty, Female, Spots, Mane, Teeth.

## Across

- 2 The African Lion's habitat is the African \_\_\_\_\_.
- 7 Some Lions die when \_\_\_\_\_ with other species for food.
- 8 Most adult male Lions have a dark - \_\_\_\_\_ which is made of shaggy hair around their head.
- 9 Lions are able to easily \_\_\_\_\_ with tall grass and other surroundings of the African Savanna so that they are able to sneak up on prey.
- 11 The \_\_\_\_\_ is responsible for taking care of the cub(s) and for teaching it/them everything it needs to survive.
- 12 Lionesses give birth approximately every \_\_\_\_\_ months.
- 14 Female Lions can go into \_\_\_\_\_ several times a year.

## Down

- 1 The African Savanna has a \_\_\_\_\_ climate.
- 2 Lion cubs have light \_\_\_\_\_ - on their bodies that disappear as they get older.
- 3 African Lions are \_\_\_\_\_ species because if things continue as they do there is a risk of them becoming endangered.
- 4 \_\_\_\_\_ Lions hunt for the pride.
- 5 The average \_\_\_\_\_ (other word for pregnancy) period for female Lions is 110 days.
- 6 African Lions travel in \_\_\_\_\_ to better defend themselves against attacking species.
- 10 When the female Lion gives birth the outcome/product is about two to \_\_\_\_\_ Lion cubs.
- 12 A Lion's \_\_\_\_\_ are strong enough to rip apart the bones, muscles and flesh of their prey.
- 13 The Lioness often gives birth in a secluded \_\_\_\_\_ -and often will move her cubs from \_\_\_\_\_ to \_\_\_\_\_ avoid predators.
